Munro FloatControl

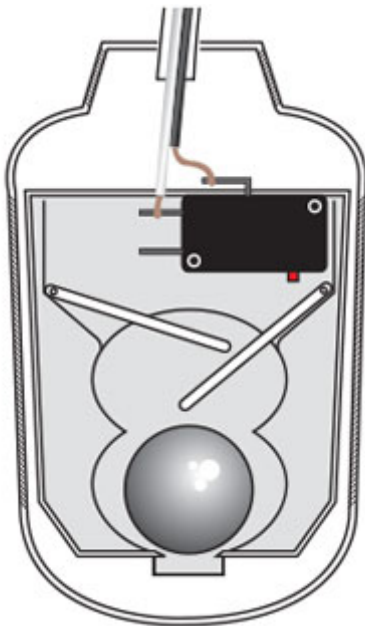

The Munro FloatControl is a direct acting, in-line control system for automatically controlling 1/2 HP and smaller pump motors; or used in conjunction with a pump start relay, to accommodate larger HP motors.

The FloatControl can easily be adjusted to various pump up/ down cycles by shortening or lengthening the cord length at the pivot point. The FloatControl is also omni-directional; the pumping differential is maintained in any horizontal position.

TECHNICAL DATA:

- 13Amp @ 120/240VAC with 16AWG cord
- Max Operating Temperature: 140 °F
- Protection Grade: IP68
- Float approved for drinking water application
